EDUCATION

Indian Institute of Information Technology (IIIT) Bhagalpur Bhagalpur, Bihar
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.5/10.0 Sep 2024 – Jul 2028
• **Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming

WORK EXPERIENCE

TakeUforward Remote
Technical Intern Jun 2026 – Present
• Produced technical articles, problem editorials, and DSA explainers for one of India's largest competitive programming platforms, translating complex algorithms into structured learning resources for a 2M+ audience.
• Authored content spanning data structures, algorithms, maintaining technical accuracy and pedagogical clarity across published articles under editorial review cycles.
• Applied hands-on DSA expertise (LeetCode Knight, 500+ problems solved) to deliver technically credible content with competitive programming depth, collaborating with senior mentors to meet weekly delivery targets.

PROJECTS

AETHER | *Secure terminal sharing* Jun 2026 - Jul 2026
• Architected a cross-platform (Windows + Linux) peer-to-peer terminal sharing tool as a Node.js/TypeScript monorepo - agent CLI, WebSocket signaling server, and React 19 web viewer - using WebRTC DataChannels and node-pty to deliver end-to-end encrypted live sessions with zero SSH configuration.
• Hardened the signaling server with sliding-window rate limiting, whitelist-based payload validation with size gates (offer/answer: 32 KB, ICE: 4 KB), room TTL auto-expiry across 500 concurrent connections, and pre-PTY sanitization of 50+ environment variable patterns (AWS, GitHub, Stripe, API keys) to eliminate credential leak.
• **Tech Stack:** Node.js, TypeScript, WebRTC, node-pty, xterm.js, React 19, Express.js, WebSockets, Tailwind CSS 4

TEDx IIIT Bhagalpur | *Official Event Website* Feb 2025 - Apr 2025
• Led a 3-developer team to design and ship the official TEDx IIIT Bhagalpur website across 6 sections, enforcing TED brand guidelines via a custom design system and Git feature-branching workflow with CI/CD on Vercel - reaching 100+ unique visitors.
• Built scroll-triggered animations and an interactive generational timeline using Framer Motion, implementing a book-flip UI pattern with 5+ animated content reveals and automated preview deployments on every push.
• **Tech Stack:** React.js, Vite, Tailwind CSS, Framer Motion, shadcn/ui, Vercel

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript
Frontend: React.js, shadcn/ui, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, MongoDB, WebSockets, JWT Authentication
AI & GenAI: OpenAI API, LangChain, RAG Pipelines, Pinecone, Prompt Engineering, Hugging Face
Machine Learning: NumPy, Pandas, Scikit-learn, TensorFlow, Streamlit
Tools & Methodologies: Git, GitHub, GitHub Actions (CI/CD), Postman, Vercel

ACHIEVEMENTS

Competitive Programming: LeetCode Knight (2000+ rating, Top 2% globally, 500+ problems solved - indrasuthar07) and CodeChef 3-Star (1600+ rating, Top percentile in Div. 2/3 - indrasuthar7).
1st Place, Opcode Open Source (IIIT Bhagalpur): Contributed production-grade features to a live open-source codebase, ranking 1st among all college-wide teams.
2nd Place, Smart India Hackathon (SIH) Internal: Engineered a HealthTech platform integrating NAMASTE and ICD-11 standards, advancing as an internal round finalist.
Mentored 15+ junior developers in DSA problem-solving and academic coursework alongside React and Node.js tracks via weekly code reviews and debugging sessions, reducing project onboarding time by 50
